

## Analysis Report

Analysis of total phenolic content in Berroxin Syrup and Sambucol Syrup.

Total phenolic content was determined by Folin-Ciocalteu method according to our internal procedure (SOP symbol: BVC/DB/SOP/007).

Results:

Syrup	Content of polyphenols [g/kg]
Berroxin	4,88
Sambucol	0,53

Data expressed as a catechin equivalents in g of polyphenols per kg of syrup.

According to obtained data Berroxin syrup contains ten times more active compounds – phenols than Sambucol syrup.
